3:Watson E-4,5 (1943) 1952 SM4 Guarani SM4

Cayuá, and diadems, headbands, armbands, and feather collarpieces are mentioned.[58] It may also be supposed that the cotton or *caraguatá* belts, which are now so commonly used and prized by the Cayuá, were also formerly known. Métraux comments, in connection with the use of cotton and *caraguatá* as weaving materials, that the Cayuá are the only Tupi-Guarani tribe to use indifferently cotton and other vegetable fibers for weaving.[59]

The Cayuá loom was the simple upright frame, with vertical posts planted in the ground. The top horizontal piece was laid in forks in the uprights, and the lower horizontal piece was tied to the uprights at the distance required. The warp was usually composed of a single continuous or knotted piece of yarn passed around and around the horizontal loom pieces. No comb or bat was used, apparently, and the woof was put through the warp by hand. The product of the Cayuá loom was a creditable article, nevertheless, and simple dyeing was practiced with several plant colors available. Women were, as they now are, the weavers of the Cayuá.[60]

Fishing lines, and cords and ropes for heavier purposes, were twisted from various vegetable fibers. Some of the ropes were strong enough to hold large animals when these were caught in nooses made from them. Since very early times the Cayuá have used metal obtained from European needles or other sources for fishhooks, so it is difficult to say what the aboriginal article may have been.

Cayuá tools and weapons included the bow and arrow, already mentioned. The bow was round in cross-section, and the arrows were two-feathered. Métraux mentions triple feathering of arrows for the Cayua,[61] but no other suggestion of this has been encountered, and it is not present in modern arrows. Clubs were formerly used by the Cayuá. Notched axes of stone and knives of bamboo are indicated,[62] but it is not known what form of aboriginal hoe or hoe-like implement was used, if any. The digging stick, or *sarakwá*, was the primary agricultural implement aboriginally, and possibly the only one; it is still in use today, not only by the Cayuá but by local Neo-Brazilians.

Cayuá men wore the long lip-stick or *tembetá* ("lip-stone"), which in their case was customarily made of the translucent resin of a certain tree. This ornament and symbol of initiation and a man's status is still in use among some Cayuá, although modern examples appear to be shorter on the average than some of the extremely long ones reported for the past—up to thirty and more centimeters. Face painting for women and children is indicated for the

[58] Métraux, 1928, p. 150. [59] *Ibid.*, p. 232.

[60] The weaving of cotton was one of the household industries of Guarani women of which the Jesuits have made considerable mention in connection with the economic organization of the missions. Some of this production was apparently sold on the outside, and the priests seem to have made much effort to inculcate the industry in their female wards.
